KM43 Water Wash Nylo Plate Instructions

1. Remove protective film.
2. Place plate and positive onto light box and cover with overlay. Switch on vacuum and smooth overlay over plate / positive. Check position of positive on plate and ensure a good vacuum is achieved 20+ Hg
3. Expose for 60-70* seconds.
4. Remove positive substitute positive with D7580 bold screen expose for a further 60-70* seconds.
5. Remove from light box, wash out under tap for 1 minute, dab dry.
6. Place back in light box for 10 minutes to harden plate.

*** Please note exposure times are those which are used on the Kaye Dee light box and may not be correct for other exposure units.**

If a deeper etch is required then reduce the exposure time. For a shallower etch increase the exposure time.
